I would like to express my opposition to petition 04-160, introduced by the National Association of Broadcasters. I am a customer of the satellite radio industry and have been more than pleased with the quality of programming, as well as the content which they provide. I am able to receive programming not provided by any provider in my local market. I spend many hours on the road each week and find the weather and traffic information extremely useful. It is troubling to hear that with as many issues out there that the FCC could be addressing, that it is even being considered that weather and traffic related programming, on a subscription only service, are in danger of facing regulation. Again, I urge you to reject this petition by the NAB, and allow satellite radio customers to continue to receive this useful information. Thank you for your consideration in the matter.
